# Practical Cleanroom Technology and Facilities for Engineers and Technicians

---

## Contents

<b>1</b>	<b>Overview of Cleanroom Technology</b>	<b>1</b>
1.1	History of cleanroom	2
1.2	The need for a cleanroom	3
1.3	How the cleanroom works?	4
1.4	Cleanrooms and semiconductor industry	5
1.5	Cleanrooms and Pharmaceutical Industry	6
1.6	Cleanrooms and Medical and life sciences	7
1.7	Cleanrooms as a system and unit operations	8
1.8	Cleanroom Standards-Old and New	10
1.9	Comparison of cleanroom standards	13
1.10	Cleanroom standards followed in other countries	15
<b>2</b>	<b>Cleanroom Basics</b>	<b>17</b>
2.1	Sources of Contaminations and Dispersion	17
2.2	Contamination Classification	20
2.3	Contamination Particles behavior	26
2.4	Source of elimination or dispersion	28
2.5	Contamination monitoring/identification for particulate contamination	31
<b>3</b>	<b>Cleanroom Construction</b>	<b>35</b>
3.1	Cleanroom Planning	36
3.2	Cleanroom Planning Guide	36
3.3	Cleanroom Materials	39
3.4	Cleanroom Designs, Layout, and Configuration	41
3.5	Recirculation Air Handling System (RAH)	46
3.6	Make-up Air System	54
<b>4</b>	<b>Cleanroom Facilities and Services</b>	<b>57</b>
4.1	Electrical Systems	57
4.2	Compressed Air System	65
4.3	Solvent Exhaust System	70
4.4	Chilled Water System	76
4.5	DI Water System	84
4.6	Hot water system and Steam generation	88
4.7	The Refrigeration System	89
4.8	Cooling system	92
4.9	Humidity and Temperature Control System	93

*Technology Training that Works*

4.10	General Exhaust Air	96
4.11	Acid waste neutralization plant	100
4.12	Hydrofluoric acid waste treatment	101
4.13	Phosphoric acid waste treatment	103
<b>5</b>	<b>Cleanroom Codes, Rules, and Regulations</b>	<b>105</b>
5.1	Cleanroom policies, rules and regulations	105
5.2	Cleanroom Etiquette	106
5.3	Cleanroom Chemicals	109
5.4	Gases (Bulk and Specialty)	112
5.5	Gas Distribution System	115
5.6	Precautions in chemical handling	118
5.7	Cleanroom Clothing and Gowning procedure	121
5.8	Gowning Procedure	124
5.9	Entry Procedure	126
5.10	Exit Procedure	127
<b>6</b>	<b>Cleanroom Testing and Monitoring</b>	<b>131</b>
6.1	Cleanroom Testing	131
6.2	Airflow velocity and uniformity test	134
6.3	HEPA Filter installation leak test	136
6.4	Airborne Particle count test	139
6.5	Room Pressurization test	141
6.6	Airflow parallelism test	142
6.7	Recovery test	143
6.8	Lighting illumination test procedure	144
6.9	Noise level test	144
6.10	Temperature and Humidity test	145
6.11	Floor Conductivity test	145
6.12	Electrostatic test	146
<b>7</b>	<b>Cleanroom Maintenance</b>	<b>149</b>
7.1	Cleanroom Cleaning	149
7.2	Cleanroom supplies	152
<b>8</b>	<b>Cleanroom Safety and Emergency Response</b>	<b>157</b>
8.1	Emergency in cleanroom	157
8.2	Power outage	158
8.3	Fire Safety	159
8.4	Fire protection systems	159
8.5	Smoke removal	160
8.6	Codes and Standards	161
8.7	Gas Leaks	161
8.8	Chemical Spills	162

*Technology Training that Works*

<b>9</b>	<b>Cleanroom Validation and Qualification</b>	<b>165</b>
9.1	Cleanroom Services	165
9.2	Validation master plan	166
9.3	User requirement specifications	167
9.4	Qualification	167
9.5	Process validation	170
9.6	Validation method-HACCP and FMEA	170
<hr/> <b>Appendices</b>		<b>173</b>
A.1	ISO 14644 Cleanroom Standard	173
A.2	Useful tables for cleanroom standards	191
A.3	Glossary of terms-Cleanrooms	201
