# Practical Pumps - Design, Operation and Maintenance for Centrifugal and Positive Displacement Pumps

---

## Contents

---

<b>1</b>	<b>Introduction</b>	<b>1</b>
	1.1 Introduction	1
	1.2 Applications	3
	1.3 Types of pumps	3
	1.4 Reciprocating pumps	4
	1.5 Other types of pumps	11
	1.6 Centrifugal pumps	12
<b>2</b>	<b>Centrifugal Pumps: Design and Construction</b>	<b>19</b>
	2.1 Introduction	19
	2.2 Impellers	19
	2.3 Pump casings	25
	2.4 Wearing rings	31
	2.5 Shaft	34
	2.6 Stuffing boxes	35
	2.7 Mechanical seals and seal housings	38
	2.8 Bearing housing / bearing isolators	52
	2.9 Couplings	56
<b>3</b>	<b>Pump Hydraulics</b>	<b>63</b>
	3.1 Introduction	63
	3.2 Specific gravity	63
	3.3 Viscosity	63
	3.4 Vapor pressure	64

*Technology Training that Works*

3.5	Flow	65
3.6	Head	65
3.7	System resistance	65
3.8	Pump efficiency	68
3.9	Hydraulic power	68
3.10	Pump characteristic curve	68
3.11	Curve corrections	71
3.12	Specific speed	73
3.13	Cavitation, recirculation, and Net Positive Suction Head (NPSH)	77
3.14	Suction specific speed	89
3.15	Performance calculation procedure	90
<b>4</b>	<b>Forces in Centrifugal Pumps</b>	<b>93</b>
4.1	Introduction	93
4.2	Axial thrust	93
4.3	Radial loads	99
<b>5</b>	<b>Centrifugal Pumps: Operation and Characteristics</b>	<b>107</b>
5.1	Introduction	107
5.2	Behavior of hydraulic properties of pumps	108
5.3	Non-dimensional characteristics	113
5.4	The cause of the QH curve	114
5.5	The inlet velocity triangle	115
5.6	What shapes the PQ curve?	116
5.7	The effect of speed changes on characteristic curves	117
5.8	The complete characteristic curve	118
5.9	Multiple pump operation	119
5.10	Pump characteristics - Viscous liquids, liquids with considerable solids	123
5.11	Pump characteristics - Abnormal operation	124
5.12	Pump characteristics – Speed torque curve	125
5.13	Discharge regulation of pumps	129
5.14	Range of pump operation	136

*Technology Training that Works*

<b>6</b>	<b>Pump Specification and Selection</b>	<b>139</b>
6.1	Introduction	139
6.2	System analysis	140
6.3	Data sheet – The pump specification document	146
6.4	Bid request	147
6.5	Bid review / analysis	147
6.6	Conclusion	149
<b>7</b>	<b>Pump Testing and Inspection</b>	<b>151</b>
7.1	Introduction	151
7.2	Material inspection requirements	152
7.3	Shop tests	154
7.4	Performance test procedure	156
<b>8</b>	<b>Pump Installation and Commissioning</b>	<b>161</b>
8.1	Introduction	161
8.2	Site location	161
8.3	Receipts and physical inspection	162
8.4	Pre-alignment checks	162
8.5	Location of pump foundation	162
8.6	Design and dimensions of pump foundation	163
8.7	Excavation and forms for pump foundation	163
8.8	Rebar and anchor bolts	164
8.9	Pouring	165
8.10	Base plate and sole plate preparation	166
8.11	Grouting	167
8.12	Installation of pump and driver	170
8.13	Associated piping and fittings	171
8.14	On site installation and commissioning of the pump set	174
8.15	Pre-operational checks	175
8.16	Preparation for start-up	175
8.17	Pump in operation	176

*Technology Training that Works*

<b>9</b>	<b>Centrifugal Pump Maintenance</b>	<b>177</b>
9.1	Introduction	177
9.2	Pump breakdown and removal	181
9.3	Single stage pumps dismantling and repair	181
9.4	Preparation for reassembly	186
9.5	Pump assembly	191
9.6	Vertical pump repair	195
9.7	Multistage pump repair	201
9.8	Optimum time to maintain pumps	205
<b>10</b>	<b>Positive Displacement Pumps</b>	<b>211</b>
10.1	Introduction	211
10.2	Reciprocating pumps	213
10.3	Diaphragm pumps	229
10.4	Rotary pumps	239
10.5	References	278
	<b>Appendix A – Pump Types</b>	<b>281</b>
	<b>Appendix B – Data Sheets</b>	<b>283</b>
	<b>Appendix C – Tutorials (Questions)</b>	<b>285</b>
	<b>Appendix D – Answers to Tutorials</b>	<b>321</b>
	<b>Appendix E - References</b>	<b>357</b>
